Measurement of Total and Free Urinary Phenol and Paraben Concentrations over the Course of Pregnancy: Assessing Reliability and Contamination of Specimens in the Norwegian Mother and Child Cohort Study

Virginia T. Guidry, Matthew P. Longnecker, Heidi Aase, Merete Eggesbø, Pål Zeiner, Ted Reichborn-Kjennerud, Gun P. Knudsen, Randi J. Bertelsen, Xiaoyun Ye, Antonia M. Calafat, Stephanie M. Engel

Table S1. Limit of detection (LOD), number and percent >LOD, geometric means, and coefficient of variation for quality control samples (n=15 aliquots from common urinary pool of 10 women).

Table S2. Spearman pairwise correlation coefficients for conjugated concentrations of phenols and parabens in micrograms per gram creatinine for complete study sample and subgroups.
